C21MM Nauru DXpedition –update October 1

The C21MM team is looking forward to its next adventure. This DXpedition to Nauru is already the most expensive and complicated expedition ever for us. Hopefully we won't encounter any more nasty surprises.

In a few days, on October 7, the first six team members will leave Germany and plan to arrive on Nauru on October 10, after an overnight stay in Brisbane, Australia. After their arrival there are still some things to organise, so limited operation (high bands only) will take place. Full operation with 5 stations 24/7 can be expected starting October 15 in the evening (local time, UTC +12). We will pay special attention to our sunrise and sunset for low band openings.

The whole team is grateful for the generous donations from early supporters. Thank you! Our QSL manager has received the LoTW certificate for C21MM. QSLs and LoTW confirmations will be sent out after our return in November.

Further news and pictures will be published on our website. Please make sure to follow us on X: https://x.com/C21MM_2024.

We will also provide **DX-World** and Daily DX with updates during the DXpedition.

We are looking forward to working you! If you have any hints during the DXpedition, please drop us an email at c21mm.info@mydx.de. (Please note this email address is not for QSL queries).

VP6WR Pitcairn Isl –update

'I'm now safely back home, having made around 18000 QSOs from VP6WR (Pitcairn) and just over 3000 QSOs from FO/G0VDE (Mangareva). Generally speaking, everything went smoothly – the damage to my case was easily sorted out, and it took only a couple of hours to mend the DXCommander and get back on air. The picture shows my VP6WR QTH and the DXCommander. A minor wrinkle was that whilst I arrived back home on the 24th of September, my main checked bag and antenna ski-bag were only delivered to me on the 26th of September, having failed to be transferred at LAX! I could see these items were there from my 'Tile' trackers, and that provided useful information to locate them. I had my Icom 705 and Juma PA1000 in my hand luggage, so I'd have had some backup if this had occurred on the way out.'

Activation of IOTA NA-119 and NA-120 –update October 2

Mike, AB5EB informs that the weather forecast has turned for the worse this morning along the Louisiana coast. It seems likely that they will not be able to make it to NA-119 as planned. The forecast looks better for NA-120 but will need to see how the weather situation plays out. Initial info below.

KH0/KC0W -update

Prior to Tom's departure in the coming months (see below), he still intends to QRV on 160m starting in October:

KH0/KC0W will be QRV on 160m starting in October. *'I haven't been on 160m since 2021 so my return should generate interest from Top Band enthusiasts looking for KH0 on FT8 and SSB.'*

VU4X Andaman Isl -update

The weather did not look too good, but Saturday, September 28, had been noted in our agenda for some time as the first VU4X antenna day. At 8 a.m. we met at Patrick ON4HIL's house. Patrick and Betty welcomed us with coffee and delicious coffee cakes. Then it was time for antenna work and we started building the first antennas. On the agenda were the 160 Mtr – 80 Mtr and 60 Mtr vertical with elevated radials. Everything was neatly measured out and it was nice to experiment and see what influences some things did or did not have on the antennas | radials.

Keep in mind, we will use non-standard frequencies from tomorrow. Unfortunately, WSJT-X changed Superfox software to rc7 so our key issued by NCDXF will not work on that.
